24/7 usage

HD high definition

multiple inputs

wide viewing angle

eco-friendly power timer

plug & play

lock protected compartment

image, video & music

scheduling software

landscape or portrait

The brand new range of HD LCD Digital Advertising Displays are designed to be a complete digital signage solution. Thanks to their built in HD media player they require no additional hardware such as PCs, DVD players, excess cables or software; you simply plug and play. The media player has the exceptional feature of full HD 1080p video display.

Their sleek, elegant tempered glass styling, ability to be in constant use, wide viewing angle, high brightness and unbranded, buttonless design are just a few reasons why our Digital Advertising Displays are used over home TVs for commercial display. A free landscape wall comes as standard.

As well as functioning as a comprehensive user-friendly standalone solution our Digital Advertising Displays has the capability to be networked for remote updates. Additionally with the new VGA, HDMI and Composite Video inputs, the display has even more applications like being used as a CCTV monitor.

An eco-friendly power timer allows the user to set what time the display turns on and off during a week. This means that your overall power consumption will be conveniently reduced as the display will not be running when it is not required.

Suitable environments for this range include retail locations like supermarkets, department stores, drug stores, show rooms and shopping centres as well as banks, bars, cafés, gyms, train/bus stations, travel agents, hospitals, schools, museums, exhibition displays, cinemas and conference halls.

Our products use a straightforward plug and play system. Simply load the content in the order you want it to be displayed onto a USB stick. Insert the USB stick into the LCD screen, wait for the data to load, remove the USB stick and your images, videos and music will be displayed.

"These HD displays are simple to use but highly versatility with many diverse applications."

40" Digital Advertising Display

40" Digital Advertising Display
